

## **together**

*(to the auly family)*

together we come with gifts in our hand  
together we plant some seeds  
together we will find our promised land  
together we know what it needs

together we play the healing game  
together we remember the light  
together we create a golden frame  
for the mirror to look inside

ref:

together we feel much better  
together we carry the load  
together we cross all deserts  
together we dance on the road

together we climb the ladder  
together we spread our wings  
together we are stronger than mountains  
together we tune our strings

together we fill every empty space  
together we sing all night  
together we grow in beauty and grace  
together we enjoy the flight

together we nurish the fire of love  
together we are riders of the tide  
together we get the bliss from above  
it makes the world so bright
